Dear FTA Community:

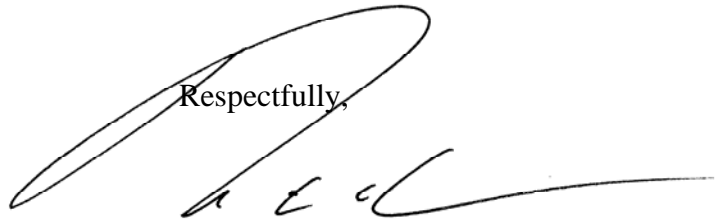

ViewTech has recently learned that Echostar and NagraStar have filed a Complaint in a California Federal District Court against ViewTech and Mr. Jung Kwak. ViewTech and Mr. Kwak intend to vigorously defend against the baseless claims made by Echostar and NagraStar. ViewTech and Mr. Kwak have already retained experienced litigation counsel to help them fight these baseless accusations.

It has also been brought to the attention of ViewTech that some of its competitors have been improperly making contact with ViewTech's distributors, dealers and customers, and maliciously conveying false information to them. They have falsely stated that ViewTech's distributors, dealers and customers are on some sort of list of alleged infringers of supposedly copyrighted materials, and that they may be liable or named in a lawsuit filed against ViewTech. They have also demanded that ViewTech's distributors, dealers and customers place a disclaimer on their respective websites disavowing ViewTech and its products.

Let's be absolutely clear — only ViewTech and Mr. Kwak have been named as potential defendants. None of ViewTech's distributors, dealers or customers are named or even identified in the allegations of the Complaint, or on any other list. The Federal Court has not been asked, nor has it given any interim relief whatsoever to either Echostar or NagraStar. ViewTech and Mr. Kwak are confident that they will prevail as the lawsuit proceeds, and they will keep all of you informed of any significant developments in the future.

Your continued business is very important to ViewTech. Indeed, all of ViewTech's success is because you have worked with ViewTech to make VIEWSAT the number one selling FTA receiver. There's a reason why VIEWSAT is number one — the quality of the products and ViewTech's customer service. You have made a choice to purchase and use the VIEWSAT line because the quality and customer service is unmatched in the industry. It is clear that those disparaging ViewTech do so only in a misguided attempt to promote their own products — products that cannot match the quality of VIEWSAT. ViewTech intends to continue supplying products that you and your customers demand, products that continue to push the bounds of FTA.

Respectfully,

Manuel de la Cerra, Esq.
Attorney for ViewTech, Inc.
